DETAILED ACTION

Claim Objections

1. Claim 39 is objected to because of the following informalities: Line 12, recites "signal, that the **first** port of the first node ..." (emphasis added). It is believed that the applicant mistyped the word 'first.' Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 29,31-33 and 39-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. The terms "similarity configured" in claim 29 and "similarly configured" in claim 39 is a relative term which renders the claim indefinite. The term "similarly configured" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. One of ordinary skill in the art cannot determine the metes and bounds of the claim.
